DIGITAL MARKETING PROGRAM

THE NEED

The need for high quality, engaging content has never been greater, thanks in large part to the rise of various social media platforms. In particular, video consumption on social media is increasing rapidly and videos are one of the best ways to engage with online users.

Facebook: 2.96 billion users

Instagram: 2.35 billion monthly users

YouTube: 2.68 billion users

Snapchat: **363 million users**

Twitter: 450 million monthly users

TikTok: 150 million users (U.S.)

THE CHALLENGE

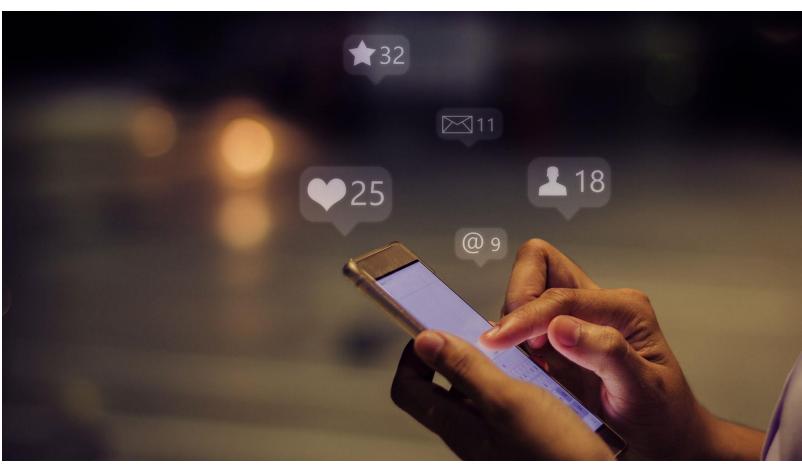

Video production requires special equipment, a studio, software, and a team of experts. That said, most small businesses either lack resources to create engaging content or do not have a budget to hire agencies.

This greatly hampers success and growth for small businesses as they can't communicate with their customers on social media and reach different audiences, especially, the younger audiences.

OUR GOAL

Our goal is to offer no-cost website / social media reviews, video and photography production and consulting services to small businesses in order to help create quality content that is engaging and actionable.

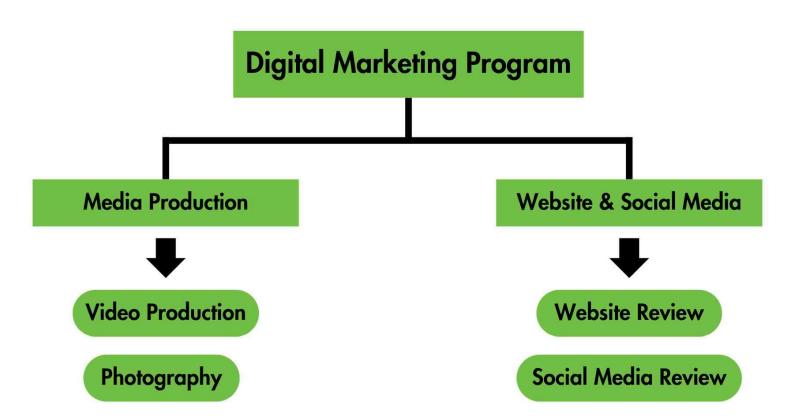

We aim to help small businesses with their digital marketing and social media needs by educating and providing them the tools that they need to successfully manage and grow their company's marketing.
